Chennai, India | Open to relocation to Leeds / UK | Require UK Skilled Worker visa sponsorship
sundarshashank@gmail.com | linkedin.com/in/shashank2301

PROFESSIONAL SUMMARY

Technical Business Analyst and delivery professional with **6+ years' experience** analysing business problems, eliciting requirements and delivering digital solutions for international clients across the **USA, UK, Canada and Japan**. Experienced in translating complex business and user needs into clear, actionable requirements, solution designs, backlogs and delivery outputs across Agile and hybrid delivery environments.

Currently work across **business analysis, Agile delivery and technical solution delivery**, leading 10+ member multidisciplinary teams and acting as a Scrum Master. Experienced in **requirements elicitation, requirements analysis and documentation, BRDs, functional requirements, user journeys, process flows, acceptance criteria, backlog management, prioritisation, UAT and stakeholder engagement**.

Strong client-facing experience, having facilitated **30+ stakeholder and requirements workshops** and worked with business, technical and senior stakeholders to build shared understanding, resolve complex problems and translate findings into practical digital solutions.

Combine business analysis capability with strong technical understanding across **Power Platform, cloud business applications, SQL, APIs, automation, AI and data**, enabling effective collaboration with development and technical teams throughout the product delivery lifecycle.

CORE SKILLS

Business Analysis:

Requirements Elicitation | Requirements Analysis | Requirements Documentation | Business Requirements | Functional Requirements | User Requirements | Process Analysis | Problem Definition | Solution Requirements | User Journeys | Process Flows | Acceptance Criteria | Impact Assessment | Technical Documentation

Agile & Product Delivery:

Agile Delivery | Scrum | Scrum Master | Backlog Management | Backlog Refinement | Prioritisation | User Stories | Epics | Iterative Delivery | UAT | Continuous Improvement | Delivery Planning

Stakeholder Management:

Stakeholder Engagement | Client Management | Senior Stakeholder Management | Workshop Facilitation | Requirements Workshops | Communication | Facilitation | Negotiation | Conflict Resolution | Cross-Functional Collaboration

Digital & Technical:

Digital Transformation | Digital Products | Power Platform | Power Apps | Power Automate | Power BI | Dataverse | SharePoint | SQL | REST APIs | RPA | AI Builder | Copilot Studio

Tools:

Jira | Azure DevOps | Power Platform | Power BI | Microsoft 365

PROFESSIONAL EXPERIENCE

SALEM INFOTECH PVT. LTD. | Chennai, India

Technical Delivery / Business Analyst | Jul 2022 – Present

- Analyse business problems and user needs and translate them into **clear business, functional and technical requirements** for digital solutions and automation initiatives.
- Lead **30+ stakeholder and requirements workshops** with clients and business stakeholders across the USA, UK, Canada and Japan to elicit requirements, clarify problems, identify priorities and establish shared understanding.
- Create and maintain **Business Requirements Documents (BRDs), functional requirements, user journeys, process flows, solution specifications and acceptance criteria**.
- Translate complex business and operational requirements into **actionable outputs for development and technical teams**, ensuring requirements are clear, testable and aligned with agreed outcomes.
- Create and manage **Jira projects, boards, workflows, backlogs, epics, user stories and tasks**, supporting prioritisation and iterative delivery.
- Use **Jira and Azure DevOps** to manage requirements, backlog items, defects, testing, changes and releases across development and production environments.
- Act as **Scrum Master**, facilitating sprint planning, daily stand-ups, sprint reviews and retrospectives and supporting teams in removing impediments.

- Work closely with developers, testers, technical specialists and stakeholders to clarify requirements, resolve complex problems and maintain delivery momentum.
- Support backlog prioritisation by assessing **business value, user needs, technical feasibility, effort, dependencies and delivery impact**.
- Lead **User Acceptance Testing (UAT)** and stakeholder validation, coordinating test scenarios, acceptance criteria, defect resolution and feedback.
- Coordinate changes and enhancements by analysing **scope, business impact, dependencies, technical feasibility, effort and delivery implications**.
- Lead multidisciplinary technical teams of **10+ members**, coordinating Business Analysis, development, testing and client activities across the delivery lifecycle.
- Support solution design and technical decision-making across **Power Apps, Power Automate, Dataverse, SharePoint, SQL, REST APIs, RPA and AI-enabled solutions**.
- Analyse operational feedback and process data to identify opportunities for **process improvement, automation and digital transformation**.
- Delivered **15+ enterprise digital solutions supporting 200+ users**, achieving approximately **40–70% reductions in manual effort** across targeted processes.
- Used Power BI and operational metrics to support improvement initiatives, reducing selected reporting activities from days to **under one hour**.
- Prepare and contribute to **tenders, Statements of Work, pricing documents, resource plans, MSAs, Work Orders and Purchase Orders**, translating requirements into commercially and technically viable delivery scopes.

GMS PVT. LTD. | Chennai, India

Digital Solutions / Business and Systems Analysis – Contract | Apr 2020 – Mar 2022

- Analysed **business and user needs** and translated findings into functional requirements, workflows and digital solution designs.
- Worked directly with stakeholders to understand **user journeys, pain points, business processes and operational challenges**.
- Supported requirements gathering, solution discovery, functional design, development coordination, testing and implementation.
- Produced **BRDs, functional specifications, process flows and application documentation** and incorporated stakeholder feedback into iterative improvements.
- Applied UX design experience to support **user-centred thinking, usability and user journey design**.
