

SHASHANK SUNDAR

Technical Product Delivery Lead | Product Management | Digital Transformation

sundarshashank@gmail.com | linkedin.com/in/shashank2301

PROFESSIONAL SUMMARY

Product-focused technical delivery professional with 6+ years' experience delivering enterprise digital solutions, automation and transformation initiatives for international clients across the USA, UK, Canada and Japan. Experienced in understanding user and business needs, framing problems, translating requirements into practical digital solutions, prioritising delivery activities and coordinating multidisciplinary teams through the product lifecycle.

Currently lead 10+ member technical teams across discovery, requirements definition, solution planning, development, UAT, deployment and continuous improvement. Experienced in facilitating 30+ stakeholder and requirements workshops, working with users and business stakeholders to understand pain points, validate requirements, manage constraints and shape solutions that improve operational outcomes.

Delivered 15+ enterprise digital solutions supporting 200+ users, including business applications, workflow automation, reporting and unattended process automation. Achieved approximately 40–70% reductions in manual effort across targeted processes and reduced selected reporting activities from days to under one hour. Use performance data, stakeholder feedback and operational insight to identify and prioritise opportunities for improvement.

Bring a combination of user-centred thinking, business analysis, technical delivery and systems understanding, supported by an MSc in Aerospace Technologies from the University of Nottingham and a BEng in Electrical & Electronics Engineering. Particularly interested in applying this experience to user-centred digital services, product development and public-sector transformation.

CORE COMPETENCIES

Product Management & Delivery: Product Discovery | User Needs | Problem Framing | Product Prioritisation | Product Lifecycle | Outcome-Focused Delivery | Continuous Improvement | Evidence-Based Decision Making

Users & Stakeholders: User & Stakeholder Engagement | Stakeholder Management | Requirements Workshops | Facilitation | User Journeys | Process Analysis | Feedback & Validation | Stakeholder Buy-in | Cross-functional Collaboration

Delivery & Leadership: Multidisciplinary Team Leadership | Agile Delivery | Delivery Planning | Scope & Change Management | Risk & Dependency Management | UAT | Acceptance Criteria | Release Coordination | Operational Readiness | Service Transition

Business & Systems Analysis: Business Requirements | Functional Requirements | Process Improvement | Impact Assessment | Solution Design | Systems Integration | Technical Constraints | Technical Documentation

Data & Digital: Performance Reporting | Power BI | Power Apps | Power Automate | Dataverse | SharePoint | SQL | REST APIs | Azure | Azure DevOps | RPA | AI Builder | Copilot Studio

PROFESSIONAL EXPERIENCE

Salem Infotech Pvt. Ltd. — Chennai, India

Technical Delivery / Business Analyst | Jul 2022 – Present

- Lead 10+ member multidisciplinary teams delivering enterprise digital solutions, translating user and business needs into prioritised requirements and guiding initiatives from discovery through deployment and continuous improvement.
- Work directly with clients, users and business stakeholders through 30+ workshops to understand user needs, business objectives, pain points and operational challenges, translating findings into practical digital solutions.
- Frame business and process problems, translate user needs into functional requirements and solution priorities, and balance desired outcomes against technical constraints, dependencies and delivery considerations.
- Support prioritisation of product requirements, enhancements and change requests based on user needs, business value, operational impact, dependencies and technical feasibility.
- Coordinate multidisciplinary teams across product discovery, solution design, development, automation, data, testing and deployment to deliver agreed outcomes.
- Use stakeholder feedback, operational issues and performance data to identify and prioritise opportunities for product and process improvement following implementation.

- Delivered 15+ enterprise digital solutions supporting more than 200 users, including business applications, workflow automation, reporting solutions and unattended process automation.
- Delivered measurable outcomes including approximately 40–70% reduction in manual effort across targeted processes and reduction of selected reporting activities from days to under one hour.
- Coordinate UAT, acceptance criteria, test scenarios, stakeholder validation and defect resolution to ensure solutions meet agreed user and business requirements.
- Apply Agile and hybrid delivery approaches across planning, development, testing, deployment and early-life support.
- Develop Power BI reporting and analytics solutions to provide performance visibility and support evidence-based improvement decisions.
- Coordinate integrations across Dataverse, SharePoint, SQL, AccessDB, REST APIs and JSON to deliver connected digital services and business processes.
- Use Azure DevOps to support delivery tracking, backlog and change coordination, testing, release activities and application lifecycle management.
- Communicate product and delivery decisions, risks, dependencies, technical constraints and implementation considerations to business and technical stakeholders.
- Produce BRDs, functional requirements, process documentation, solution specifications and technical documentation supporting delivery, adoption and ongoing improvement.
- Support resource planning, effort estimation, costing and delivery planning for proposed solutions and enhancements.

Delivery Lifecycle: Requirements → Planning → Solution Design → Development → Testing/UAT → Deployment → Operational Readiness → Early-Life Support

GMS Pvt. Ltd. — Chennai, India

Digital Solutions / Business & Systems Analysis- Contract | Apr 2020 – Mar 2022

- Analysed user and business needs and translated them into functional requirements, workflows and digital solution designs.
- Worked directly with stakeholders to understand business processes, user journeys, pain points and opportunities for improvement.
- Supported solution discovery, functional design, development coordination, testing and implementation across digital initiatives.
- Produced functional specifications, process flows and application documentation to communicate requirements and user needs to technical teams.
- Coordinated stakeholder feedback throughout development and supported resolution of functional and implementation issues.
- Identified opportunities to simplify processes, improve usability and enhance digital experiences through continuous improvement.

CERTIFICATIONS	EDUCATION
● Professional Scrum Master I (PSM I) ● Microsoft Applied Skills: Create and Manage Automated Processes by Using Power Automate ● Salesforce Administrator ● Salesforce Associate	● MSc Aerospace Technologies <i>University of Nottingham, UK</i> 2018 – 2019 ● BE Electrical & Electronics Engineering <i>Anna University, India</i> 2013 – 2017
