PROFESSIONAL SUMMARY

Client-facing technical delivery professional with 6+ years' experience delivering enterprise digital solutions, automation and transformation initiatives for international clients across the USA, UK, Canada and Japan. Experienced across commercial and delivery activities, including tenders, SOWs, pricing, resource planning, MSAs, Work Orders, POs, project reporting and requirements documentation.

Lead 10+ member multidisciplinary teams, working directly with clients and business stakeholders to understand needs, shape solutions, coordinate delivery and resolve challenges. Experienced in bringing together Delivery, Technical and Resourcing teams to align scope, commercial requirements, timelines, resources and delivery commitments.

Conducted 30+ stakeholder workshops and delivered 15+ enterprise digital solutions supporting 200+ users, achieving approximately 40–70% reductions in manual effort across targeted processes and reducing selected reporting activities from days to under one hour. Now seeking to apply this combination of client management, commercial delivery and digital transformation within a UK digital consultancy.

CORE COMPETENCIES

PROFESSIONAL EXPERIENCE

SALEM INFOTECH PVT. LTD. | Chennai, India

Technical Delivery / Business Analyst | Jul 2022 – Present

- Lead 10+ member multidisciplinary technical teams, coordinating clients, business stakeholders, developers, technical specialists and delivery resources from discovery through deployment and continuous improvement.
- Work directly with international clients across the USA, UK, Canada and Japan, building relationships, understanding business needs, managing expectations and resolving delivery challenges.
- Conducted 30+ stakeholder and requirements workshops, translating business objectives, user needs and operational pain points into requirements, solution scope and delivery priorities.
- Prepare and submit tenders, SOWs, pricing documents, Work Orders, POs and MSA documentation, coordinating commercial, technical, delivery and resource inputs.
- Support commercial planning and solution estimation through effort assessment, costing, pricing, resource planning and delivery forecasting, balancing client requirements with technical feasibility and delivery capacity.
- Coordinate Delivery, Technical and Resourcing inputs to develop commercially and technically aligned proposals and SOWs for client review and approval.

- Translate client requirements into BRDs, functional requirements, solution specifications, scope definitions and delivery plans, ensuring business objectives and technical considerations are aligned.
- Identify and assess change requests, enhancements and additional requirements, considering business value, scope, dependencies, technical feasibility, effort and delivery impact.
- Support client solution discussions by identifying opportunities where automation, workflow improvement, reporting and digital solutions can deliver measurable business value.
- Coordinate resource planning and project mobilisation, aligning capabilities, team capacity, timelines and delivery priorities.
- Coordinate delivery across requirements, solution design, development, testing, UAT, deployment, operational readiness and early-life support, maintaining visibility of risks, dependencies and milestones.
- Produce project reports and delivery updates covering progress, risks, issues, resources and key delivery activities for stakeholder review.
- Delivered 15+ enterprise digital solutions supporting 200+ users, including business applications, workflow automation, reporting and unattended process automation.
- Achieved approximately 40–70% reductions in manual effort across targeted processes and reduced selected reporting activities from days to under one hour.

GMS PVT. LTD. | Chennai, India

Digital Solutions / Business & Systems Analysis – Contract | Apr 2020 – Mar 2022

- Analysed business and user needs and translated them into functional requirements, workflows and digital solution designs.
- Worked directly with stakeholders to understand business processes, user journeys, operational pain points and improvement opportunities.
- Supported solution discovery, functional design, development coordination, testing and implementation across digital initiatives.
- Prepared business requirements, functional specifications, process flows and application documentation, coordinating stakeholder feedback with technical teams.
