PROFESSIONAL SUMMARY

Technical delivery professional with 6+ years' experience delivering enterprise digital solutions, software-enabled transformation and automation initiatives for international clients across the USA, UK, Canada and Japan. Experienced in leading multidisciplinary technical teams through the full delivery lifecycle from discovery and requirements through solution design, development, testing, UAT, deployment, operational readiness and continuous improvement.

Currently lead 10+ member technical teams and act as a Scrum Master, facilitating Agile ceremonies, managing Jira backlogs and delivery tracking, coordinating dependencies and supporting teams in removing delivery blockers. Strong client-facing experience, with responsibility for stakeholder engagement, requirements workshops, delivery planning, risk and change management, resource planning and governance.

Experienced across the commercial and delivery lifecycle, including tenders, Statements of Work, pricing, resource planning, MSAs, Work Orders, Purchase Orders and project reporting. Combine strong technical understanding with business analysis and delivery leadership across Microsoft technologies, automation, cloud-based business applications and system integrations.

Delivered 15+ enterprise digital solutions supporting 200+ users, achieving approximately 40–70% reductions in manual effort across targeted processes and reducing selected reporting activities from days to under one hour.

CORE COMPETENCIES

Delivery Management: Agile Delivery | Scrum | Delivery Planning | Risk & Dependency Management | Resource Planning | Governance | Change Management | UAT | Release Coordination | Operational Readiness

Agile & Collaboration: Scrum Master | Sprint Planning | Daily Stand-ups | Sprint Reviews | Retrospectives | Backlog Management | Jira | Azure DevOps | Stakeholder Workshops | Continuous Improvement

Client & Stakeholder Management: Client Relationship Management | Requirements Workshops | Stakeholder Engagement | Expectation Management | Issue Resolution | Cross-functional Collaboration | Decision Facilitation

Commercial Delivery: Tenders | Statements of Work | Pricing & Costing | Resource Planning | MSAs | Work Orders | Purchase Orders | Project Reporting | Scope Management

Business & Systems Analysis: Business Requirements | Functional Requirements | User Journeys | Process Analysis | Acceptance Criteria | Solution Design | Impact Assessment | Technical Documentation

Digital & Technical: Digital Transformation | Power Platform | Power Apps | Power Automate | Power BI | Dataverse | SharePoint | SQL | REST APIs | RPA | AI Builder | Copilot Studio

PROFESSIONAL EXPERIENCE

SALEM INFOTECH PVT. LTD. | Chennai, India

Technical Delivery / Business Analyst | Jul 2022 – Present

- Lead 10+ member multidisciplinary technical teams across discovery, requirements, solution design, development, testing, UAT, deployment, operational readiness and continuous improvement.
- Act as Scrum Master, planning and facilitating sprint planning, daily stand-ups, sprint reviews and retrospectives, while supporting teams in removing blockers and maintaining delivery momentum.
- Create, structure and maintain Jira projects, boards, workflows, backlogs, epics, stories and tasks, providing clear visibility of priorities, progress, dependencies and delivery status.
- Use Jira and Azure DevOps to manage backlogs, requirements, defects, testing, changes, releases and delivery governance across development and production environments.
- Build trusted relationships with clients and stakeholders across the USA, UK, Canada and Japan, translating business needs into actionable requirements and delivery plans.

- Lead 30+ stakeholder and requirements workshops, bringing together business, technical and delivery stakeholders to clarify objectives, challenge assumptions and agree practical solutions.
- Prepare and coordinate tenders, Statements of Work, pricing documents, MSAs, Work Orders, Purchase Orders, project reports and resource plans, aligning commercial, technical and delivery inputs.
- Support delivery planning through resource planning, estimation, costing, prioritisation, risk and dependency management, balancing scope, timelines, technical constraints and available resources.
- Translate client requirements into BRDs, functional requirements, user journeys, process flows, solution specifications and acceptance criteria, supporting implementation-ready delivery.
- Coordinate multidisciplinary teams across technical development, business analysis, testing and client stakeholders, managing delivery risks, dependencies, issues and changes throughout the project lifecycle.
- Lead UAT and stakeholder validation, coordinating test scenarios, acceptance criteria, defect resolution and readiness for production deployment.
- Support solution architecture and technical delivery across Power Platform, Power Automate, Power Apps, Dataverse, SharePoint, SQL, REST APIs and automation, working closely with developers and technical specialists.
- Delivered 15+ enterprise digital solutions supporting 200+ users, including business applications, workflow automation, reporting and unattended process automation.
- Achieved approximately 40–70% reductions in manual effort across targeted processes, with selected reporting activities reduced from days to under one hour.
- Drive continuous improvement following implementation by analysing operational feedback, identifying enhancements and coordinating changes through the delivery lifecycle.

GMS PVT. LTD. | Chennai, India

Digital Solutions / Business & Systems Analysis – Contract | Apr 2020 – Mar 2022

- Analysed business and user needs and translated them into functional requirements, workflows and digital solution designs.
- Worked with stakeholders to understand business processes, user journeys and pain points, identifying opportunities for process improvement and digitalisation.
- Supported solution discovery, functional design, development coordination, testing and implementation across digital initiatives.
- Produced BRDs, functional specifications, process flows and application documentation, incorporating stakeholder feedback and supporting resolution of technical and usability issues.
