

Shashank S

Senior Power Platform Developer | SharePoint | Power BI

Chennai, India | (+91) 883-873-1384 | sundarshashank@gmail.com | [linkedin.com/in/shashank2301](https://www.linkedin.com/in/shashank2301)

Power Platform and Microsoft 365 technology professional with 5+ years of hands-on experience delivering enterprise business applications, SharePoint solutions, workflow automation, and analytics for clients across the USA, UK, Canada, and Japan. Hands-on across Power Apps, Power Automate, Power Pages, Dataverse, SharePoint Online, SPFx, React.js, TypeScript, Fluent UI and Power BI, with enterprise integration using Microsoft Graph API, Azure Functions, Azure Logic Apps, REST APIs, Dynamics 365, SAP, SQL and third-party systems. Experienced in SharePoint architecture, migration, governance and security, advanced Power BI modelling, embedded analytics, ALM, UAT, deployment and production support.

CORE SKILLS

Power Platform: Power Apps (Canvas, Model-driven), Power Automate Cloud/Desktop, Power Pages, Dataverse, Power Fx, AI Builder, Copilot, Copilot Studio, ALM, DLP, Governance

SharePoint / M365: SharePoint Online, Architecture, Migration, ShareGate, Microsoft Migration Manager, SPFx, React.js, TypeScript, Fluent UI, Teams, OneDrive, Purview, Entra ID

Power BI: Desktop/Service, Advanced DAX, Power Query, Data Modelling, Analysis Services, Tabular & Multidimensional Models, KPI Scorecards, Publishing, Scheduling, Embedded Analytics, Power BI API

Integration / Azure: Microsoft Graph API, REST/JSON, SQL, Azure SQL Database, Azure Functions, Azure Logic Apps, Dynamics 365, SAP, third-party systems, standard/premium connectors

Delivery: Requirements, Solution Design, UAT, ALM, Azure DevOps, CI/CD, Deployment, Hyper-Care, Production Support, Troubleshooting, Agile/Scrum

KEY ACHIEVEMENTS

- Delivered 15+ enterprise Power Platform and Microsoft 365 solutions for global clients across the USA, UK, Canada and Japan.
- Designed Power Apps, Power Automate, SharePoint and Dataverse solutions supporting 200+ users and monitored 11+ production workflows/applications.
- Delivered Power BI reporting and analytics solutions reducing reporting cycles by up to 90%, including embedded reporting within business applications.
- Implemented Power Platform ALM, governance, DLP, role-based security, and Dev/Test/Prod environment management using Azure DevOps.
- Delivered automation and RPA solutions reducing manual processing effort by up to 70%, including ERP and legacy-system integrations.

PROFESSIONAL EXPERIENCE

Salem Infotech Pvt. Ltd. — Chennai, India | July 2022 – Present

Power Platform Developer

- Developed enterprise Power Apps (Canvas and Model-driven), Power Automate Cloud/Desktop, Power Pages and Dataverse solutions, including responsive applications, approval workflows and business-process automation.
- Delivered SharePoint Online architecture, data management, permissions, governance and security; executed SharePoint migrations using ShareGate and Microsoft Migration Manager, covering assessment, mapping, validation and post-migration support.
- Developed SPFx solutions using React.js, TypeScript and Fluent UI; built Microsoft Graph API integrations and extended Power Platform solutions using Azure Functions and Azure Logic Apps.
- Integrated SharePoint/Microsoft 365 with Teams, OneDrive for Business, Purview and Entra ID, applying identity, access, data-protection and governance controls; integrated Dynamics 365, SAP, Azure SQL/SQL and third-party applications through standard/premium connectors and REST/JSON APIs.
- Developed advanced Power BI solutions using DAX, Power Query, Analysis Services, tabular and multidimensional models; created KPI scorecards/dashboards, published and scheduled reports, and implemented embedded analytics/API-based reporting.
- Applied AI Builder, Microsoft Copilot/Copilot Studio and Azure AI capabilities to intelligent automation and conversational business scenarios; troubleshoot, optimise and maintain production solutions.
- Managed ALM and secure delivery across Dev/Test/Prod using Azure DevOps, solutions, CI/CD, DLP and role-based access; led requirements, design, development, testing, UAT, deployment, Hyper-Care and production support.

PROJECT EXPERIENCE

NTN Americas (USA, Japan) – Order & Approval Automation

- Developed Canvas Power Apps with SharePoint Online and Power Automate for order tracking, multi-level approvals, role-based access, and notifications.
- Built Power BI dashboards and embedded reporting for operational KPIs and management analytics; integrated Microsoft 365/enterprise data through connectors and REST/JSON.
- Business outcome: Reduced approval and tracking time by 50%.

G&W Electric (USA, Canada) – Order Management Platform

- Developed Power Apps, Power Automate, and SharePoint solution for order tracking, approval management, and process automation.
- Built a Power Pages portal for external submission and integrated role-based workflows and Power BI KPI reporting.
- Business outcome: Increased production efficiency by 38%.

Ennvee Technogrup (USA) – Employee Management System

- Developed a Dataverse-based Power App for onboarding, KPI tracking, leave and timesheet management with role-based access.
- Automated employee lifecycle processes with Power Automate and developed Power BI dashboards using DAX, Power Query and data modelling.
- Business outcome: Streamlined lifecycle management and improved performance visibility.

Bunzl (UK) – Invoice Processing Automation

- Integrated Power Automate with JD Edwards ERP to automate invoice processing, approvals, reminders and payment workflows.
- Developed Power Apps for tracking and Power BI reporting; implemented enterprise API/data integration and exception handling.
- Business outcome: Reduced invoice processing time by 65%.

KeHE Distributors (USA) – RPA Order Automation

- Developed Power Automate Desktop RPA for legacy order processing, inventory, approvals, and batch allocation.
- Integrated Excel, MS Access, and SharePoint with automated data-processing workflows, scheduling, and exception handling.
- Business outcome: Improved operational efficiency by 53%.

GMS Pvt. Ltd. — Chennai, India | April 2020 – Mar 2022

Business Automation Consultant (Power Platform) - Contract

- Developed Power Apps and Power Automate solutions for order management, invoicing, and inventory using SharePoint, Dataverse, and SQL-backed data.
- Built Power Automate Cloud/Desktop RPA workflows and integrated enterprise/third-party systems using standard and premium connectors, REST APIs, and JSON.
- Worked with business users on requirements, process analysis, solution design, testing and UAT, delivering scalable low-code applications.
- Supported deployment, troubleshooting, optimisation and production support while applying security, governance and maintainability practices.
